ABOUT ME

Slash coding in 2020

Hello there !!!! I am a motivated Computer Science student who started self coding in 2020 and is always looking to learn new techniques in the field. With a few years of experience in back end development and data science, they have honed my skills and I am currently focused on NLP and Recommendation Systems.

EXPERIENCE

Backend Intern Ship Golang| Rapixus Tech

03 2022 - 07 2022

Taichung, Taiwan

- Architecture Design: 10 times faster than old system
- Secure Update API: Use DFS find out the connection between secure Issues

Back-end Data-Engineer JAVA| Worm Hole-Tech

03 2021 - 03 2022

Hsinchu, Taiwan

台惟工業 Intelligent Manufacturing system :

- Collecting data from MQTT server.
- Predicting machine life cycle
- Reduce electric consumption 5%

欣興電子 IQC system:

- Learned the entire development and design process
- Understood how functional specification documents evolve into fully functional systems
- Prior experience in warehouse domain helped optimize the system
- Listened to client needs, gathered requirements, and developed solutions accordingly

EDUCATION

MS:Computer Science

LAB:KDD(KNOWLEDGE DISCOVERY AND DATA MINING)

National Taiwan Normal University

2022-Present

Taipei,Taiwan

NSTC Project : Analysis web user Mantel health

- Knowing the people mantel health.
- Predicting the poster mantel is health or un-health.
- Prompt LM knowing where unhealthy stance is.

BS:Marketing National Chung Shine University

2013-2018

Taichung, Taiwan

- Martech
- Consumer Behavior
